TECHNICAL SKILLS

BACKEND

Laravel 12, PHP 8.2, Next.js APIs,
Node.js

FRONTEND

React 19, TypeScript, Blade, HTML,
modern CSS

DATA

MongoDB, Mongoose, SQL, SQLite

PLATFORMS

Docker, Cloudinary, Vercel, Netlify,
Railway

ENGINEERING

Authentication, RBAC, validation,
rate limiting, audit logs, PHPUnit,
Git

EDUCATION

Higher National Diploma

Current second-year student

Full-stack web development, secure
application design, database
modeling and software engineering
practices.

CORE STRENGTHS

System thinking
End-to-end ownership
Fast, practical learning

PORTFOLIO CV / 2026

K A DULANJAN ANUSHIKA

FULL STACK DEVELOPER | HND STUDENT

PROFESSIONAL PROFILE

Second-year HND student and full-stack developer building secure, data-driven web systems from database design and backend logic to responsive interfaces. Project experience includes role-based workflows, authentication, order-state management, inventory controls, QR experiences, digital warranties and automated testing. Seeking a full-stack development internship where I can learn quickly and contribute to real products.

SELECTED ENGINEERING PROJECTS

01 Restaurant QR System

Next.js 16 | TypeScript | MongoDB

Multi-role QR ordering platform for customers, kitchen staff, waiters, cashiers and administrators.

- Implemented role-based authentication, order-state history, staff assignment and payment tracking.
- Modeled inventory, recipes, sessions and audit logs around the restaurant workflow.

[LIVE PRODUCT](#) | [SOURCE CODE](#)

02 Device Passport

Next.js 16 | React 19 | TypeScript | SQLite

Device lifecycle platform for health reports, inspections, QR passports and digital warranties.

- Created owner, technician and support dashboards with role-specific workflows.
- Built service and claim history, backups, customer tracking and public device passports.

[LIVE PRODUCT](#) | [SOURCE CODE](#)

03 TechSphere Phone Shop

Laravel 12 | PHP 8.2 | Blade | SQL

Production-minded commerce system covering catalogue, comparison, checkout and administration.

- Engineered atomic stock reservation and restoration with idempotent, rate-limited checkout.
- Added invoices, scheduled jobs, notification retry logs and PHPUnit test coverage.

[SOURCE CODE](#)

04 JobFinder Laravel

Laravel | PHP | Railway

Job portal connecting job seekers with employer listings and application workflows.

- Built job search, employer listing, account and application features in one Laravel product.
- Published the working application on Railway for live portfolio review.
