

K A DULANJAN ANUSHIKA

FULL STACK DEVELOPER | HND STUDENT

Colombo, Sri Lanka | +94 76 451 6146 | dulanjananushika@gmail.com
[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

+ PROFESSIONAL PROFILE

Second-year HND student and full-stack developer building secure, data-driven web systems from database design and backend logic to responsive interfaces. Experienced through project work in multi-role workflows, authentication, order state management, inventory controls, QR experiences, digital warranties and automated testing. Seeking a full-stack development internship with opportunities to learn quickly and contribute to real products.

+ TECHNICAL SKILLS

Backend: Laravel 12, PHP 8.2, Next.js route handlers, Node.js, JWT, authentication, middleware

Frontend: React 19, TypeScript, Blade, HTML, modern CSS, responsive interface development

Data and platforms: MongoDB, Mongoose, SQL, SQLite, Cloudinary, Docker, Vercel, Netlify, Railway

Engineering: Data modeling, role-based access control, validation, rate limiting, audit logs, PHPUnit, Git

+ CORE STRENGTHS

Product thinking: Translates real workflows into users, permissions, states and practical features

End-to-end ownership: Connects database design, backend rules and responsive interfaces as one system

Learning velocity: Turns new concepts into working builds and improves them through iteration

+ SELECTED ENGINEERING PROJECTS

Restaurant QR System | Next.js 16 | TypeScript | MongoDB

- Built a QR ordering platform connecting customers, kitchen staff, waiters, cashiers and administrators through one shared order workflow.
- Implemented role-based authentication, status history, staff assignment, payment state, inventory and recipe models, sessions and audit logs.

[LIVE PRODUCT](#) | [SOURCE CODE](#)

Device Passport | Next.js 16 | React 19 | TypeScript | SQLite

- Developed a device lifecycle platform for signed health reports, technician inspections, QR passports, customer handover and digital warranties.
- Created role-based dashboards, service and claim history, backups, public device passports and owner-only operational analytics.

[LIVE PRODUCT](#) | [SOURCE CODE](#)

TechSphere Phone Shop | Laravel 12 | PHP 8.2 | Blade | SQL

- Engineered product catalogue, comparison, checkout, stock control, invoices and protected administration workflows.
- Added atomic stock reservation and restoration, idempotent rate-limited checkout, scheduled jobs, notification retry logs and PHPUnit coverage.

Additional project: JobFinder Laravel - job search, employer listings, accounts and application workflows deployed on Railway. [LIVE PRODUCT](#) | [SOURCE CODE](#)

+ EDUCATION

Higher National Diploma | Current second-year student

Applied learning in full-stack web development, secure application design, database modeling and software engineering practices.
